### Lamina: Monolayer Sheet Line

Rajoo presents, for the first time in Asia, a Monolayer Sheet Line with a 600 kg/hr output from a 75 mm extruder. Asia's most energy efficient extruder, this solution, significantly profits the semi flexible packaging industry (disposable containers), stationery, and more.

### Tilting Mould High Speed Thermoformer

The industry has always recognised Rajoo as an innovator, quality supplier and a forefront runner in empowering the processing industry with advanced technologies. This recognition was further reinforced when Rajoo addressed the long-standing demand of the industry for stacking solutions for low weight glasses, high productivity and comfort of use with minimal manpower. Rajoo introduces India's first ever Tilting Mould High Speed Thermoformer. The disposable containers market witnessed an integrated thermoforming, stacking, counting and packing solution; Rajoo fulfills its market commitment.

### About Rajoo

Based in Rajkot, Rajoo Engineers Limited, having made a modest beginning in 1986, has today emerged as an undisputed global player in blown film and sheet extrusion lines. Owing to its focused efforts in blown film and sheet extrusion lines, the Company enjoys premium market position in this segment. Being a technology driven Company, product innovations, world-class quality, state-of-the-art workmanship, increased energy efficiency and high levels of sophistication and automation have become the hallmark of Rajoo products during all these years, positioning the Company's products on a global platform, competing with the established world leaders. With representations in many countries of the world and customers in over 60 countries, the Company's exports have multiplied after its debut in the international market in 1990.
