OKUMA MULTUS U4000 FROM JAPAN

The state-of-the-art installation is a part of Rajoo's investment plan announced in 2024, is set to advance its manufacturing excellence to global standards and reflects Rajoo's ongoing commitment to Total Quality Management (TQM) and future-ready production.

This high-precision multitasking machine Okuma MULTUS U4000 delivers advanced 5-axis machining by integrating turning, milling, drilling, and gear cutting into a single, highly automated setup. Installed at Shree Yantralaya – The Machine Shop, Rajoo’s state-of-the-art in-house machining zone, is a temperature-controlled, dust-free facility designed to produce critical components with consistently high accuracy. The addition of this Japanese machine significantly enhances the company’s ability to reduce lead times, improve quality, and reduce external dependencies.

“This investment represents our continuous focus on building world-class capabilities. The MULTUS U4000 brings greater agility and precision to our core manufacturing, ultimately creating more value for our global customers.” said Mr. Utsav Doshi, Joint Managing Director, Rajoo Engineers Ltd.

The installation aligns with Rajoo’s broader vision of innovation driven manufacturing and supports its commitment to lean practices, sustainability, and Total Quality Management. With this strategic addition, Rajoo is further equipped to serve a rapidly evolving market with speed, reliability, and global-standard excellence.

About Rajoo:

Rajoo Engineers Limited, founded in 1986 and headquartered in Rajkot, has evolved into a prominent global player in blown films, sheet extrusion lines. Through a dedicated focus on blown film, sheet extrusion lines, thermoformers and extrusion coating and laminating lines, the company has attained a prestigious market position. Driven by technology, Rajoo is renowned for its product innovations, world-class quality, state-of-the-art workmanship, enhanced energy efficiency, and sophisticated automation, distinguishing its offerings on a global scale. With a presence in numerous countries and a customer base spanning over 78 nations, the company's exports have surged since its international debut in 1990.
