

Rajoo Engineers Boosts Production with Advanced Japanese Machinery

November 15, 2024 By: [iiinewsdesk](#)

Rajoo Engineers Ltd., a leader in plastic extrusion machinery, has taken a major step in manufacturing innovation. The company invested ₹300 million in upgrading its “Yantralaya” machine shop with advanced 5-axis multitasking machinery from Japan.

This investment increases production capacity by 40%, improves precision, and reduces manual intervention. The upgrade reflects Rajoo’s commitment to Total Quality Management (TQM) and meeting global demand for high-quality extrusion machinery.

Mr. Utsav Doshi, Joint Managing Director, said, “This expansion is about more than just production—it’s about leveraging technology to deliver excellence and value for our customers.”

Rajoo Engineers continues to push the boundaries of manufacturing in India with this strategic move.
