## **RAJOO ENGINEERS INSTALLS COORDINATE MEASURING MACHINE (CMM)**

**Industry News** 

**♡** Dec 05,24

With its detailed measuring capabilities, high-speed drive, and scanning accuracy, the MACH-V9106 can measure various components weighing up to 2500kg.

Rajoo Engineers Limited, a global leader in plastic extrusion machinery manufacturing, has made a significant leap in precision and quality control with the installation of a Coordinate Measuring Machine (CMM). This strategic addition marks a transformative step in the company's commitment to technological excellence.

Located at Rajoo's manufacturing facility, the newly installed MACH-V9106 CMM, sourced from renowned global technology leader Mitutoyo Japan, represents a major investment in enhancing the accuracy and consistency of Rajoo Engineers' manufacturing set up. This advanced machine ensures that every product meets the highest quality standards, further solidifying the company's reputation for reliability and innovation.

With its detailed measuring capabilities, high-speed drive, and scanning accuracy, the MACH-V9106 can measure various components weighing up to 2500kg. Additionally, its advanced thermal compensation technology guarantees reliable measurements according to the properative of the

"Integrating the MACH-V9106 into our operations underscores our commitment to adopting advanced technologies that redefine industry benchmarks. This advancement is applyed in part of our mission to deliver superior engineering solutions to our global clients," said **Utsav Doshi**, Joint Managing Director, Rajoo Engineers Ltd.
