Rajoo Engineers Limited (<https://www.rajoo.com/>) a prominent manufacturer of plastic extrusion machinery, has been officially listed on the National Stock Exchange of India Limited (NSE) as of 29 May 2025. With nearly four decades of experience in the extrusion industry, this development marks a major advancement in the company's journey and underscores its continued focus on excellence, credibility, and sustainable growth.

The company's shares will now trade under the symbol RAJOOENG on the NSE. This move is expected to enhance the company's visibility within the investment community and broaden its access to capital markets. The listing also reflects Rajoo Engineers' long-term approach to value creation for its stakeholders.

Managing Director Khushboo Chandrakant Doshi stated that the listing is a reflection of the enduring trust of stakeholders and represents an important step toward greater transparency and market accessibility. She reaffirmed the company's commitment to building on its legacy of performance and innovation.

Rajoo Engineers Limited maintains a leadership position in the plastic extrusion sector, supported by a foundation of technological innovation, customer-oriented solutions, and sustainability-focused practices. The company's presence on both of India's key stock exchanges demonstrates a commitment to strong governance and transparency.

Founded in Rajkot in 1986, Rajoo Engineers began as a modest venture and has since become a leading global supplier of blown film and sheet extrusion lines. The company's strategic focus on these core segments, along with the development of Thermoformers, has secured a premium position in both domestic and international markets.
