Rajoo Engineers Ltd., a leading name in the plastic extrusion machinery manufacturing industry, has announced a significant investment of ₹3 crore to upgrade its state-of-the-art machine shop, *Yantralaya*. The expansion introduces cutting-edge 5-axis vertical multitasking machinery from Japan, marking a milestone in the company’s pursuit of excellence in manufacturing.

This strategic move has increased the company’s production capacity by an impressive 40%, enhancing both precision and efficiency while bolstering its Total Quality Management (TQM) standards. The integration of advanced technology minimizes human intervention during production, reduces reliance on manual processes, and ensures the delivery of high-quality extrusion machinery to meet growing global demand.

Commenting on the development, Mr. Utsav Doshi, Joint Managing Director of Rajoo Engineers Ltd., stated, “The investment in Yantralaya and the integration of advanced
